

Easy Login

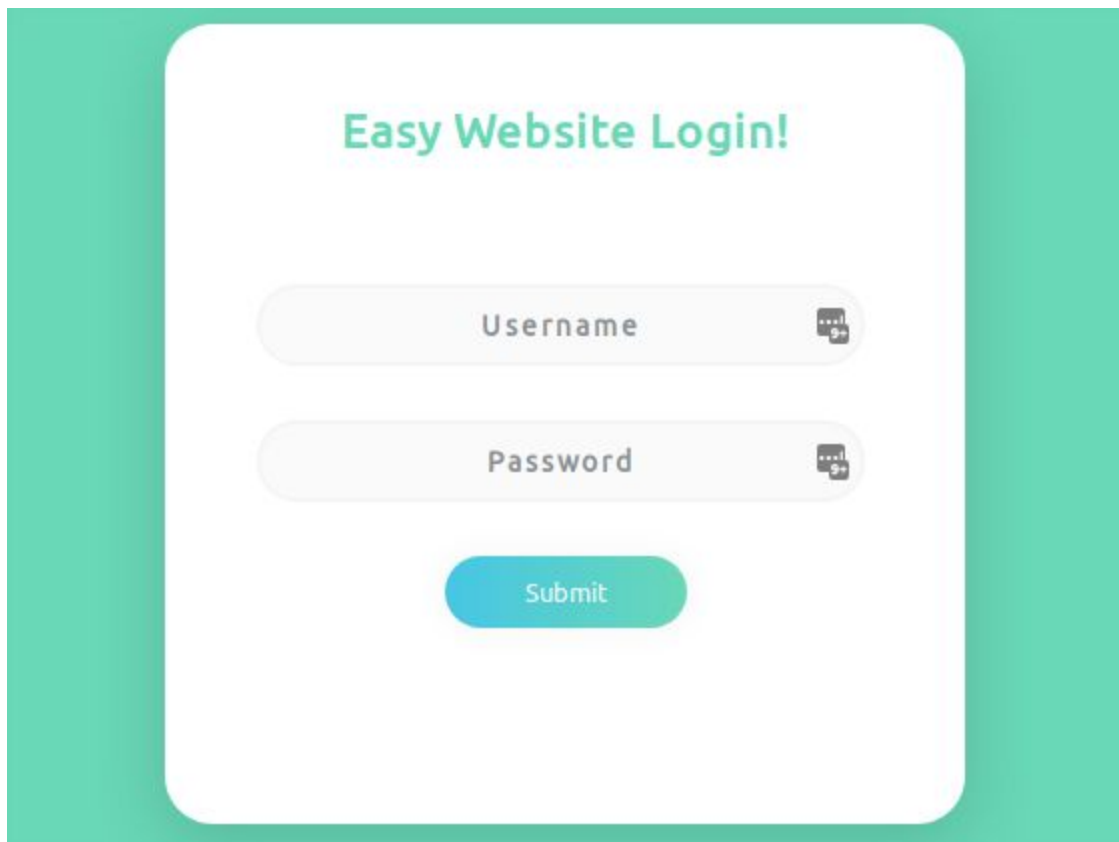

This was a web based challenge where the goal is to recover the login credentials.

The challenge:

Can you get past this login?

<http://redacted-url>

After visiting the URL you were presented with a login screen:

The image shows a web login interface. It has a teal background with a white rounded rectangle in the center. Inside the rectangle, the text 'Easy Website Login!' is displayed in teal. Below this, there are two input fields: 'Username' and 'Password'. Each field has a small icon of a document with a plus sign on the right side. At the bottom of the white rectangle is a teal 'Submit' button.

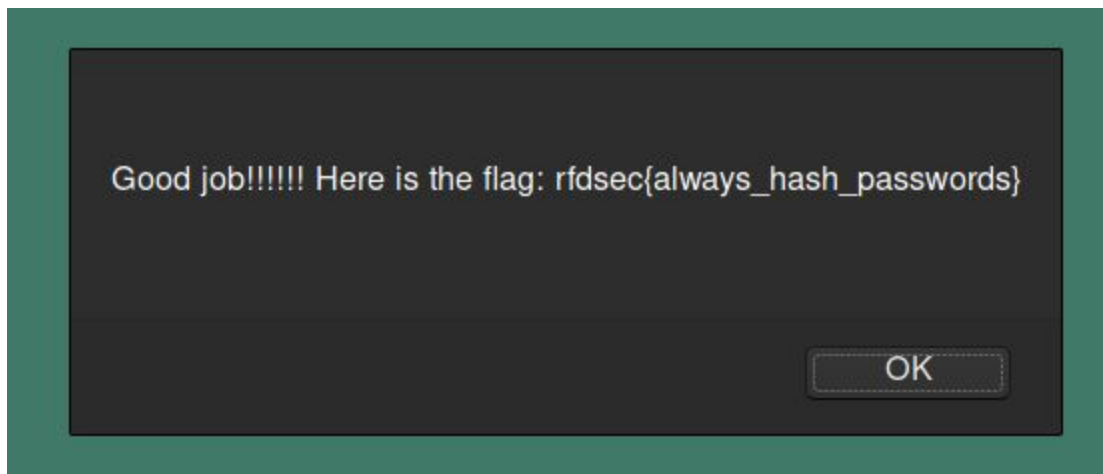

It is always a good idea to look at the source code in CTFs. If you did that here you'd find this comment:

```
<!-- TODO update login code and  
      and encrypt /data/creds.dat-->
```

Visit <http://redacted-url/data/creds.dat> and you'd get the .dat file, which is just a text file that contains the username and password:

```
Username,password  
admin,R34llyG00dP455sW0rd
```

Enter those creds and you'd be presented with the flag:

Flag: flag{always_hash_passwords}
